

Build-a-Bike Team Building

About the activities

A Bikeworks Build-a-Bike event is corporate team building with a difference. Not only will you participate in some fantastic bicycle-based challenges but your event will also directly benefit a charity of your choice. Participants must work together within their teams to achieve the end goal of building a bike which will then be donated to a nominated charity.

The activity encourages communication, creativity, dexterity and through participating in the challenges a bit of fun competition as well!

Bicycle-based challenges

Start your event with fun challenges:

- All Ability Challenge – a simulated challenge manoeuvring an adapted bike through a course blindfolded
- Re-use & Recycle Challenge – creatively designing products out of recycled tyres
- Team Tyre Challenge – racing to complete the perfect puncture repair
- Slow Race – demonstrating your bike control skills

Each challenge has been designed to enable participants to have fun while working on their collaboration, communication and leadership skills!

Build-a-bike

Choose to build either children's bikes, BMX bikes or adult bikes during your event and to which organisation you wish to donate the bikes.

The bikes are then gifted to the charity of your choice, or to our partner local charities and community projects. In addition, we reinvest 100% of profits into our community cycling programmes.
